1) The amendment filed 2/21/2007 is acknowledged.

2) The drawings were received on 2/21/2007. These drawings are acceptable.

3) Claims 1-12 are allowed.

The system for optical storage device speed error compensation, comprises a circuit for receiving an speed error signal and outputting a first tracking control effort signal, a feed-forward controller for receiving the speed error signal and generating a second tracking control effort signal according to a DC steady state error in the speed error signal, an optical head module for moving at an actual speed determined by the total of the first tracking control effort signal and the second tracking control effort signal, a gain controller for generating a feedback speed signal according to the actual speed of the optical head module, and a comparison device subtracting the feedback speed signal from a predetermined speed signal to generate the speed error signal, as recited in the independent claims, are not found or suggested in the prior art of record.
